

## **“Post-Transplant Lymphoproliferative Disease”**

Presented by:  
Lecia Snell, RN, MSN, CCTN

**Target Audience:** This program is designed for healthcare professionals who provide patient care at all levels in transplantation. The course is designed for, but not limited to transplant nurses.

**Program Overview/Description:** Speaker will improve the understanding and explore the impact of post-transplant Lymphoproliferative disease in the solid organ transplant recipient long-term care.

**Learning Objectives:** At the conclusion of this conference, participants should be able to:

- Discuss the issues surrounding malignancies in the post-transplant recipient.
- Identify the clinical characteristics, presentation, and pathogenesis of Epstein Barr Virus (EBV) in the normal and immunocompromised host.
- List three risk factors for the developmental of PTLN in the transplant recipient.
- Discuss current prevention techniques and treatment options available for the management of PTLN.

**Planning Committee:** None members of the planning committee have any disclosures to claim

**Criteria for successful completion:** All attendees must attend the entire meeting; complete the evaluation form and passing post-test of 75% to receive CE credit of attendance.

**Conflict of interest:** The speaker has no disclosures to claim. The speaker will make presence or absence of conflict of interest prior to their presentation.

**Meeting Sponsorship:** None for this offering

**Participant name:** \_\_\_\_\_

Please rate the program and speaker items by placing a mark in the appropriate column.

	Excellent 4	Good 3	Fair 2	Poor 1	Not Applicable
Program Evaluation					
1. Program met the stated objectives					
2. Content covered topic adequately					
3. Overall quality of this program					
4. Overall quality of speakers					
5. Quality of the program facilities					
6. Program met my personal objectives					
7. I can incorporate program content into my practice					

**Program Comments:**

**Future Program Suggestions:**

**October 18, 2011**

**Speaker Name:** Lecia Snell, RN, MSN, CCTN

1. Were the following objectives met?
  - Discuss the issues surrounding malignancies in the post-transplant recipient. \_\_\_ Yes \_\_\_ No
  - Identify the clinical characteristics, presentation, and pathogenesis of Epstein Barr virus (EBV) in the normal and immunocompromised host. \_\_\_ Yes \_\_\_ No
  - List three risk factors for the development of PTLD in the transplant recipient. \_\_\_ Yes \_\_\_ No
  - Discuss current prevention techniques and treatment options available for the management of PTLD. \_\_\_ Yes \_\_\_ No
  
2. Evaluate the speaker on teaching effectiveness on a scale of 5 (excellent) to 1 (poor): 5 4 3 2 1
  
3. Was the information presented fair, balanced and without bias? \_\_\_ Yes \_\_\_ No

Post-Test:

1. Post-transplant lymphoproliferative disease is the result of a dysfunction in which function of the immune system?
  - A. Defense
  - B. Homeostasis
  - C. Major Histocompatibility system
  - D. Surveillance
  
2. Most post-transplant lymphoproliferative disease is caused by the primary disease or reactivation of which virus.
  - A. BK Virus
  - B. Cytomegalovirus
  - C. Epstein Barr Virus
  - D. Influenza Virus
  
3. The most at risk population for the development of post-transplant lymphoproliferative disease is:
  - A. CMV negative pediatric patient
  - B. CMV positive adult patient
  - C. EBV negative pediatric patient
  - D. EBV positive pediatric patient
  
4. Treatment options for post-transplant lymphoproliferative disease include:
  - A. Anti-viral medications
  - B. Chemotherapy
  - C. Reduction of immunosuppression
  - D. Rituximab
  - E. Surgery
  - F. A, C and D
  - G. A,B, and C
  - H. A,C,D and E
  - I. All of the above
  
5. Patient education should include the patient reporting:
  - A. Enlarged lymph nodes
  - B. Fevers
  - C. New onset snoring
  - D. All of the above
